- jQuery
- Ruby
- Ruby on Rails
- PostgreSQL
- Git
- Bootstrap
- AJAX
- Agile Methodologies
- Jira
- Confluence
- Microsoft Office
- Balsamiq
- SharePoint

ABOUT ME

I have always been tech savvy and have had a successful start to my career as an IT Business Analyst. I have worked with various tech stakeholders using agile methodologies to deliver projects in the digital & e-Commerce space.

Recently I started to gravitate towards working more closely with dev teams to gain a deeper understanding of software engineering. It inspired me to take on the challenge of learning programming and gain the technical skills needed to solve complex problems - not through requirements but code.

EXPERIENCE

WEB DEV IMMERSIVE STUDENT

GENERAL ASSEMBLY | JUN 18 - AUG 18

Web Development training working on the below projects:

- **//TODO: Meet You** - a dating app developed as part of a team. Built with HTML, sassCSS, Ruby on Rails, PostgreSQL, Javascript, JQuery, AJAX and various APIs. Deployed on Heroku: <https://todo-meetyou.herokuapp.com/>
- **PwnLists (pronounced 'pown')** - A fun game collection website developed with Ruby on Rails using various APIs. <https://pwnlist.herokuapp.com/>
- **Tic Tac Toe** - A simple game built with HTML, CSS, Javascript and jQuery. <https://shelleyyz.github.io/tic-tac-toe/>
- **Rez (WIP)** - A mental health focused blogging application featuring a chatbot named Rez. <https://rez-bot.herokuapp.com/>

DIGITAL PRODUCER & BUSINESS ANALYST (CONTRACT)

NSW DEPARTMENT OF EDUCATION | MAR 18 - MAY 18

- Assisting the Digital Services Directorate with project coordinating the re-platforming and redesign of the department's intranet and a major update to SchoolBiz, the primary channel for business communication to all schools in NSW. This dual role required analysis of requirements, content producing digital media and change management.

ASSOCIATE BUSINESS ANALYST

METCASH | AUG 16 - MAR 18

- I was offered a permanent role after the graduate program as a business analyst in the IT business engagement team. Our primary focus was to deliver IT solutions and business process improvements across Metcash and its business pillars.

IT GRADUATE

METCASH | JAN 16 - AUG 16

- Started in the graduate program rotating between the IT Project Management Office (PMO) and eCommerce team. I focused primarily on project management and BA tasks i.e. facilitating daily stand ups, standardising process via business process improvements & workshopping, creating user manuals and conducting user training.
